

MC137C Right angle PMDC gearmotor

Right angle single reduction PMDC gearmotor

The MC137C is an economically priced compact, light duty, but durable right angle worm gearmotor for those applications requiring a rugged gearmotor in a compact size. It is a conservatively designed workhorse. This tough universally mountable gearmotor is available with a left or right handed configuration as well as double output shafts and will handle many applications, such as feeders, conveyors, pumps, printing presses, mixers, etc. The driven load can be connected by coupling, sprocket, pulley or gears. The gearmotor design incorporates integral motors directly mounted to the gearcase. Other design features include forged bronze worm wheel, hardened steel worm shaft, high tensile strength die cast aluminum alloy gearcase, all ball bearing construction with double lipped oil seals on the input and output shafts. When you have special requirements, these gearmotors will accept many modifications required for difficult applications.

Specifications

- Gear ratios: 6, 8.5, 11.3, 17, 21.5, 27, 34, 44, 54
- Motor: 3.25" OD, 0.25 hp TENV
- Output speed: 45–417 rpm
- Voltage: 24V and 36VDC
- Output shaft: keyed 5/8" diameter
- Mounting: 3 bolt on 2" BC or 4 bolt base

Features

- Low profile
- Hardened steel and bronze gearing
- Ball bearing construction
- Field replaceable motor
- Grease lubrication for life
- Aluminum housing
- Replaceable motor brushes

Options

- Output shaft configuration
- Motor terminals
- Foot mounted base plate
- Left and right hand outputs
- Dual opposing output

Applications

- Floor care equipment
- Mobile medical equipment
- Door openers
- Mixers
